Pathological Gait

Definition

Pathological gait is an abnormal pattern of walking characterized by deviations from the normal gait cycle due to disorders affecting the musculoskeletal, neurological, or other body systems.

Types of the Pathological Gait

1. [Parkinson gait](#)
2. [Scissors Gait](#)
3. [Hemiplegic Gait](#)
4. [Ataxic Gait](#)
5. [Foot Drop Gait](#)
6. [Antalgic Gait](#)
7. [Quadriceps Gait](#)
8. [Calcaneal Gait](#)
9. [Trendelenburg Gait](#)
10. [Waddling Gait](#)
